Plant and Soil **143**: 321–323, 1992.

Contents of Volume 143 1992

Volume 143, No. 1

C. E. Prescott, J. P. Corbin and D. Parkinson, Immobilization and availability of N and P in the forest floors of fertilized Rocky Mountain coniferous forests 1
R. M. Monaghan and D. Barraclough, Some chemical and physical factors affecting the rate and dynamics of nitrification in urine-affected soil 11
J. S. Bailey, Effects of gypsum on the uptake, assimilation and cycling of ^{15}N-labelled ammonium and nitrate-N by perennial ryegrass 19
F. H. Brække, Root biomass changes after drainage and fertilization of a low-shrub pine bog 33
S. B. Wuest and K. G. Cassman, Effects of variations in soil water potential, depth of N placement, and cultivar on postanthesis N uptake by wheat 45
H. Flessa and W. R. Fischer, Plant-induced changes in the redox potentials of rice rhizospheres 55
D. L. Osmond, D. J. Lathwell and S. J. Riha, Prediction of long-term fertilizer nitrogen requirements of maize in the tropics using a nitrogen balance model 61
B. Gworek, Lead inactivation in soils by zeolites 71
M. S. El-Abyad, A. M. Abu-Taleb and M. S. Khalil, Impact of salinity stress on soil-borne fungi of sugarbeet. III. Plant cell wall-degrading enzymes by *Rhizoctonia solani* Kühn and *Sclerotium rolfsii* Sacc. in vivo and in vitro 75
S. A. Materechera, A. R. Dexter, A. M. Alston and J. M. Kirby, Growth of seedling roots in response to external osmotic stress by polyethylene glycol 20,000 85
M. S. Cox and S. A. Barber, Soil phosphorus levels needed for equal P uptake from four soils with different water contents at the same water potential 93
S. Olsson and B. Gerhardson, Effects of long-term barley monoculture on plant-affecting soil microbiota 99
I. Šafařík and H. Šantrůčková, Direct determination of total soil carbohydrate content 109
E. M. Birk, Nitrogen availability in radiata pine plantations on former pasture sites in southern New South Wales 115
K. A. Oglesby and J. H. Fownes, Effects of chemical composition on nitrogen mineralization from green manures of seven tropical leguminous trees 127
S. B. Sharma, F. Waliyar, P. Subrahmanyam and B. J. Ndunguru, Role of *Scutellonema clathricaudatum* in etiology of groundnut growth variability in Niger 133

Short communications

H. F. Bienfait and M. R. Scheffers, Some properties of ferric citrate relevant to the iron nutrition of plants 141
P. I. Orphanos, Inhibition of ammonium sulphate nitrification by methylpyrazol in a highly calcareous soil 145
K. Turnau, J. Mitka and A. Kedzierska, Mycorrhizhal status of herb-layer plants in a fertilized oak-pine forest 148

Acknowledgement 153

Volume 143, No. 2

A. B. Rosenani and H. A. Chulan, Availability of nitrogen from ^{15}N-labelled *Azolla pinnata* and urea to flooded rice 153
D. R. Parker, J. J. Aguilera and D. N. Thomason, Zinc-phosphorus interactions in two cultivars of tomato (*Lycopersicon esculentum* L.) grown in chelator-buffered nutrient solutions 163
M. D. Cahn, D. R. Bouldin and M. S. Cravo, Nitrate sorption in the profile of an acid soil 179
T. S. Gahoonia and N. E. Nielsen, The effects of root-induced pH changes on the depletion of inorganic and organic phosphorus in the rhizosphere 185
C. Nguyen, W. Yan, F. Le Tacon and F. LaPeyrie, Genetic variability of phosphate solubilizing activity by monocaryotic and dicaryotic mycelia of the ectomycorrhizal fungus *Laccaria bicolor* (Maire) P.D. Orton 193
